

EXAMEN DE FIN D'ÉTUDES SECONDAIRES – Sessions 2025

QUESTIONNAIRE

Date :	15.09.25	Horaire :	08:15 - 12:15	Durée :	240 minutes
Discipline :	CMPRM - COMME	Type :	écrit	Section(s) :	CA-LLCO / CI
				Numéro du candidat :	

Les genres médiatiques – 15 points

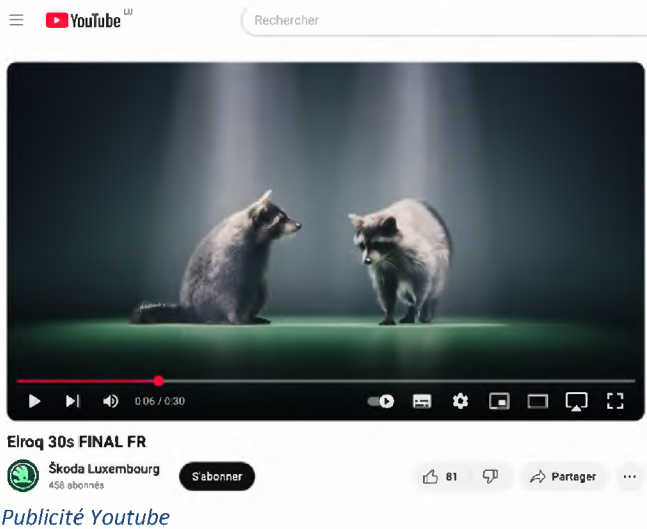

- Consultez le document « Is this the end of NATO ? » (Annexe 1) paru sur *Politico.eu* le 15 février 2025 et répondez aux questions suivantes :
 - De quel type d'information et de quel genre médiatique s'agit-il ? (1)
 - Comparez ce genre médiatique avec le genre de l'*analyse* en vous référant aux principales caractéristiques des 2 genres. (4)
- Quels éléments essentiels doit contenir un communiqué de presse ? Appuyez votre réponse sur l'exemple en Annexe 2 (« Wereldhave and Wereldhave Belgium acquire shopping centers Knauf Pommerloch and Knauf Schmiede in Luxembourg ») en illustrant chaque point avec un extrait pertinent du texte. Vous pouvez utiliser l'exemple en annexe pour illustrer vos idées. (6)
- Pourquoi peut-on dire qu'internet a changé la façon dont nous consommons l'information ? Présentez au moins 3 idées. (4)

Introduction au Marketing – 23 points

- Fondée en 2017, RSS-Hydro est une entreprise spécialisée dans la simulation d'inondations afin de prédire le risque de crues. Analysez le marché tel que les fondateurs de RSS-Hydro l'ont fait en 2017 en vous référant aux 5 étapes de l'étude des marchés. Consultez le site web de *Luxembourg Space Agency* (Annexe 3) pour vous aider. (5)
- RSS-Hydro a décidé d'étendre ses activités et de proposer leurs services aux particuliers (DE : Einzelpersonen / Privatpersonen). Ils ont développé une application mobile fournissant aux utilisateurs des prévisions météorologiques ultra-précises et des alertes personnalisées en fonction de leur localisation. L'objectif est d'aider les particuliers à mieux anticiper les intempéries et à adapter l'entretien de leurs espaces verts en conséquence.
 - Déterminez le public cible qui pourrait s'intéresser à un tel produit. Qui sont les utilisateurs potentiels de cette applications. (2)
 - Créez un persona en lui donnant aux moins 8 caractéristiques. (5)
 - Quelles stratégies de vente proposeriez-vous aux responsables de RSS-Hydro ? Présentez au moins deux stratégies et expliquez en quoi elles sont adaptées au produit ainsi qu'au public cible. (5)

6. Pour l'exemple ci-dessous :

- De quelle stratégie de vente s'agit-il ? (0,5)
- Quels sont les 3 principes fondamentaux sur lesquels repose la stratégie ? (3)

Affiche dans l'espace public

Publicité sur l'application RTL

7. Sophie se promène dans le centre commercial lorsqu'elle aperçoit une robe en promotion dans une vitrine. Attirée par l'offre, elle entre dans le magasin, l'essaie et décide de l'acheter sur un coup de tête. Une fois chez elle, elle réalise qu'elle n'avait pas prévu d'acheter des vêtements et qu'elle n'en avait pas vraiment besoin.

- De quel type de consommateur Sophie fait-elle partie ? (0,5)
- Définissez ce type de consommateur. (2)

L'ergonomie des sites internet – 22 points

8. Le site en Annexe 3 n'étant qu'une présentation de leur entreprise sur le site de l'agence spatiale luxembourgeoise (*Luxembourg Space Agency*), les responsables de RSS-Hydro aimeraient créer leur propre site *www.rsshydro.lu* afin de promouvoir leur nouvelle application.
- a. Expliquez comment vous choisiriez les éléments du design du site. Argumentez vos choix pour :
 - Les 2 couleurs principales
 - L'écriture
 - 2 stratégies de design(9,5)
 - b. Vous vous basez sur le principe de la pyramide inversée pour structurer l'information sur le site. Dessinez la pyramide et annotez la avec les informations que vous décidez de mettre sur le site *rsshydro.lu*. (9)
9. Analysez le site *cfl.lu* (Annexe 4).
- a. Identifiez 2 lois de la Gestalt et définissez-les. Mettez-les en évidence sur la capture d'écran dans l'annexe. (2)
 - b. Argumentez le choix de la grande image sélectionnée par les designers du site. (1,5)

What would Britain's iconic wartime leader Winston Churchill make of the Munich Security Conference in 2025? | Tobias Schwarz/AFP via Getty Images

UNPACKED

FEBRUARY 15, 2025 4:00 AM CET

BY JAMIE DETTMER

MUNICH — U.S. President Donald Trump is a longtime fan of Winston Churchill. But what would Britain's iconic wartime leader make of the Munich Security Conference in 2025?

“You were given the choice between war and dishonor. You chose dishonor and you will have war.” Those are the words Churchill thundered when then-Prime Minister Neville Chamberlain left this Bavarian city 87 years ago, clutching a piece of paper that turned out to be meaningless.

Would that be Churchill's reaction to Trump's drive to end the war in Ukraine, with terms that Kyiv and its European allies fear will be favorable to Moscow and only mean another bigger war down the road?

The word “appeasement” is on European lips here, and for the more historically sensitive — like Britain's former Defense Minister Ben Wallace — the echo of Munich circa 1938 seems an obvious reference point.

As they gathered for the summit today, European officials were still reeling from the readout of Trump's 90-minute phone call with Russian President Vladimir Putin, as well as U.S. Defense Secretary Peter Hegseth's mid-week remarks in Brussels. For former Lithuanian Foreign Minister Gabrielius Landsbergis, the most overlooked and chilling line that came from Hegseth was his warning that “realities” will prevent the U.S. from being Europe's security guarantor.

In other words — no U.S. backstop.

Like others, Landsbergis senses an end of an era. “It may well mark the advent of the twilight of NATO,” he said. “Especially when you combine it with what I think Washington will soon announce — the withdrawal of 20,000 U.S. troops from Europe.”

As the Lithuanian spoke with POLITICO in Munich, Hegseth was in Warsaw, foreshadowing a troop draw down and warning already frazzled Europeans that “now is the time to invest because you can’t make an assumption that America’s presence will last forever.”

Much like it’s been in the U.S., the Trump administration’s nonstop, fast-moving shock-and-awe announcements have been overwhelming and disorienting in Europe too — as the strategy is, no doubt, designed to be. Wrong-footing opponents and critics, giving them little time to draw breath and reorient.

And U.S. lawmakers attending the summit have been trying to offer some reassurance to an anxious Europe — though not to much avail.

Among them was Senator Roger Wicker, chairman of the powerful Senate armed services panel, who told POLITICO that Hegseth made “a rookie’s mistake” in Brussels: “I don’t know who wrote the speech — but it could have been written by Tucker Carlson. Carlson is a fool,” he said, soothingly reassuring that there are plenty of serious people around Trump who he heeds.

Wicker also noted that Hegseth had already walked back some of his harsher remarks, but admitted he hadn’t yet done so when it comes to Europe losing the U.S. security guarantee — which undermines NATO’s Article 5 committing alliance members to collective defense.

And it is that line, more than any other, that's setting European teeth on edge — along with harsh lines like: “Make no mistake, President Trump will not allow anyone to turn Uncle Sam into ‘Uncle Sucker.’”

“Trump’s direct approach to Putin, combined with Secretary of Defense Hegseth informing allies in Brussels that the U.S. is preemptively acquiescing to some of Russia’s core demands before talks have even begun is a double blow — not only to Ukraine but to the future of Europe,” remarked Chatham House’s Keir Giles.

“[Accepting] that the aggressor can retain the territory it has seized in exchange for a plea for peace — the parallels with 1938 could only be clearer if Trump had held up a note and said Mr Putin had assured him he had no further territorial ambitions in Europe.”

Meanwhile, Vice President JD Vance's Munich speech, focused on criticizing democratic practice in Europe, is doing nothing to ease European qualms — nor those of pro-NATO Americans.

It was received stonily, with only occasional smatterings of applause and a few politely shaking heads, when he started talking about migration as a threat to European civilization. “The threat that I worry the most about vis-à-vis Europe is not Russia. It's not China, it's not any other external actor. And what I worry about is the threat from within,” he said.

“Consider the audacity of someone who ran on a ticket with a man who inspired a riot against our Congress in 2020, to come to Europe and say, ‘You guys have got problems with democracy,’” said academic and former U.S. diplomat Michael McFaul. “And we've got a constitutional crisis going on right now with executive overreach and the health of American democracy.”

Vance also ignored the elephant in the room — the Ukraine war. “He could have used the speech to clarify their negotiating position and he chose not to. This speech was for people back home, not for people at the summit,” McFaul added. Not that McFaul gives European democracy a clean bill of health — but this was neither the time nor the place for the considerable chutzpah on display, he said.

Three years ago, Russia's invasion of Ukraine seemed to make NATO more relevant than it had been — gone was the search for a *raison d'être* in a post-Cold War world. But it was hard here, on the summit's first day, to shake the feeling that we're witnessing the start of a cleaving. Sure, the summits during Trump's first term also had a “U.S. vs. Europe” feel, but his former national security team would smooth things out. Feathers would be ruffled — not plucked.

And for Europe, the U.S. remains the exceptional nation, the indispensable one to summon in times of trouble. Who else is there to turn to now?

Maybe oneself.

Former German diplomat Wolfgang Ischinger told POLITICO that “maybe Europe needed to be tasered,” to be shocked into being more forward-leaning and self-reliant.

His position is that European leaders are partly to blame for the situation they’re now bemoaning. They had ample warning about what the U.S. president’s second term might entail, and yet moved far too slow to increase their own defense spending and share of the transatlantic burden.

Landsbergis’s successor Kęstutis Budrys agrees that Europe has been laggardly. “We are late, really. We have to speed up and show that we have real defense, and that we are ready and capable and trained to fight,” he told POLITICO.

But Budrys hopes this isn’t a “Munich moment” like 87 years ago. “The fact we mention 1938 shows we have an awareness and it is a sign we are seeking to avoid that. Yes, there’s the risk that some elements might be repeated, but we can also see how to avoid it,” he said. And that will require all the allies to share “the seriousness of the situation we are facing,” if they want to preserve NATO.

But others wonder if this is all too late and fear the Trump administration isn’t a friend but a foe. One senior EU diplomat, granted anonymity to speak candidly, said: “We’ve now got an alliance between a Russian president who wants to destroy Europe and an American president who also wants to destroy Europe.”

“The transatlantic alliance is over.”

Wereldhave and Wereldhave Belgium acquire shopping centers Knauf Pommerloch and Knauf Schmiede in Luxembourg

Press release

13 February 2025, 05:45 PM CET

Wereldhave N.V. ('Wereldhave') and Wereldhave Belgium (57% owned by Wereldhave) have reached agreement with Nextensa N.V. on the acquisition of two shopping centers in Luxembourg. Wereldhave Belgium acquires Knauf Shopping Pommerloch and Wereldhave acquires Knauf Shopping Schmiede. The acquisition marks the next step of the LifeCentral strategy growth phase and perfectly fits Wereldhave's acquisition criteria, such as location, value creation opportunities and Full Service Center transformation potential. The total purchase price for the two centers amounts to € 167m, including transaction costs, reflecting a net initial yield of 8.0%, well above the cost of financing. The transaction has an immediate accretive impact on Wereldhave's direct result per share (DRPS).

Acquisition of Knauf Shopping Pommerloch by Wereldhave Belgium

Wereldhave Belgium acquires Knauf Shopping in Pommerloch, Luxembourg, including parking and development land with a total gross leasable area of approx. 33,000 m². Wereldhave Belgium fully financed the acquisition with newly raised unsecured debt.

Acquisition of Knauf Shopping Schmiede by Wereldhave N.V.

Wereldhave acquires Knauf Shopping in Schmiede, Luxembourg, including parking and development land with a total gross leasable area of approx. 41,000 m². The transaction was partially paid (56%) by issuance of € 35m in 2,206,838 new ordinary Wereldhave shares via a contribution in kind and partially with € 28m drawn from existing credit facilities.

The transaction has an immediate accretive annualized impact on Wereldhave's DRPS of € 0.05. Therefore, Wereldhave raises its full-year 2025 DRPS guidance to the higher end of the range of € 1.70-1.80. The acquisition has a limited effect on financial leverage (EPRA LTV).

Both transactions were completed on 13 February 2025.

Matthijs Storm, CEO of Wereldhave and Wereldhave Belgium, commented: "This acquisition of two key centers in Luxembourg, a core market for Wereldhave, marks an important step in the growth phase of our LifeCentral strategy. Both assets meet our strict acquisition criteria and will deliver earnings accretion. Also, Knauf Schmiede and Knauf Pommerloch strengthen our Full Service Center portfolio and offer strong potential for value creation such as reversionary potential in leasing as well as transformation and development opportunities. The centers will be fully owned by Wereldhave and Wereldhave Belgium and are anchored by top five Delhaize stores in the Benelux. With our existing and experienced Belgium team managing the assets, we are well-positioned to enhance their performance and long-term success."

About Knauf Shopping Pommerloch

Shopping center Knauf Pommerloch houses circa 70 tenants in the categories of fashion, services, food, beauty, decoration, jewellery, leisure, multimedia stores and more. It was built in 2002 and most recently renovated in 2020, including a new parking and extension. Located in the heart of the Luxembourg Ardennes, near Bastogne in Belgium. The center comprises of approx. 33,000 m² GLA, of which 23% is mixed-use, and 1,200 parking spaces. In addition, the complex has a 3,130 m² business center. Key tenants include notable brands such as Delhaize, New Yorker, C&A, H&M Q8, La Varenne Group, Sportsdirect and more.

About Knauf Shopping Schmiede

Shopping center Knauf Schmiede with about 55 stores lies in the north of the Grand Duchy of Luxembourg, on the border between Luxembourg, Belgium and Germany. It was built in 1995 and fully renovated and extended in 2022. The center comprises of approx. 41,000 m² GLA, of which 18% is mixed-use, and a parking with 1,200 parking spaces. Tenants include well-known brands such as Delhaize, Brico, H&M, Q8, La Varenne Group, Sportsdirect, Arkadium and Tom & Co.

Webcast for analysts and investors

Wereldhave will host a live analyst and investor webcast on Friday, February 14, at 10:00 AM CET.

Access to the webcast is available on: https://channel.royalcast.com/landingpage/wereldhave/20250214_1/

Investor Presentation

An investor presentation with details of the transaction is available on our website here: <https://www.wereldhave.com/investor-relations/reports-publications/presentations/>

CORE BUSINESS

R&D in remote sensing applications and computer simulations of water risks. RSS-Hydro employs traditional methods and advanced machine learning models to extract actionable information from geospatial datasets and to simulate water risks at impact level scales. Our innovative remote sensing technology services, including drones and satellites as well as computer models are developed in-house to respond to the needs of our customers.

PRODUCTS & SERVICES

- Remote sensing and computer simulations of water risks at local to global scales;
- Flood & fire disaster response assistance with Earth Observation (EO) products and services;
- Flood event re-analysis using EO data and computer models;
- Expert consulting services in remote sensing and modelling of water risks and environmental applications;
- Drone services and products for the natural and the built environments.

TECHNICAL MEANS

- Almost 20 years of expertise in academia and R&D in the field of remote sensing and computer simulations of water risks;
- Our team members have many years of expertise in hydrology, geospatial data analytics, and machine learning applications;
- Experience in IoT, in particular using open geospatial web services;
- Expertise in drone technologies and services.

MAIN CUSTOMERS

Applied research funding sources:

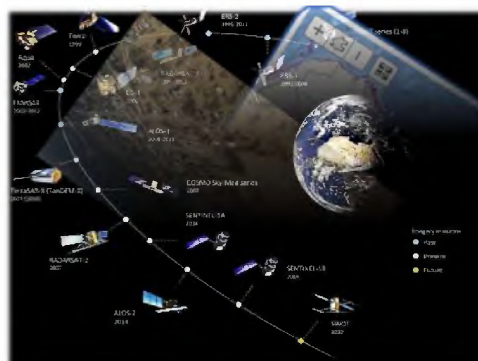

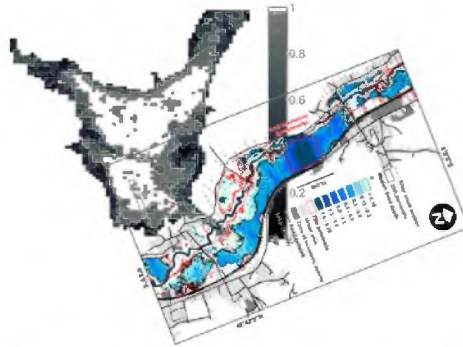

- Government departments;
- Space agencies;
- Private sector companies;
- Public institutions (including universities);
- NGOs and international organisations;
- European Commission.

R&D services provision to:

- Government departments and other public sector entities
- City Councils
- Development aid organisations;
- Humanitarian response organisations;
- Private sector, including the (re)insurance sector.

MAJOR SPACE PROJECTS

- ESA Incubed project "FloodSENS": Smart Mapping of Floods - <https://incubed.phi.esa.int/portfolio/floodsens/>
- Active R&D projects focus mainly on flood & fire disaster response assistance using EO products and services;
- Participation and mentoring in NASA/Europe Frontiers Development Lab (FDL);
- Acquisition of high-resolution drone data and provision of services to a variety of sectors.
